Introduction: There are two types of people living in the society, the one who has given their rights and respect because they have the money, the frame and have everything like education or know everything about their rights and the second who hasn't given their rights and respect because they did not have the money, the frame and doesn't have everything like education or know everything about their rights. This is a biggest problem in the society because this create a class differences between the peoples living in the people. This also led to the chaos between the rich people, middle-class people and poor people or a men and a women or black and white. This is because the people always respect the rich people then poor people because rich have more and more money and frame than poor people or they always have would be desire to give more priority to the men than women or they always show more respected toward the white and always show disrespected the black. If the class difference between the people increase day by day then there would be a chance to increase the injustice between them. Injustice, like given the powerful man or a women more favor than a people are who are not powerful man or a women in the court and media even if they are wrong. Because they always show their power to given more favor and attendance to them so that the people who admire him or her would forget about the poor people who help a real real help in the society. Another injustice is like to give someone a respect and also give disrespected the other. If you take an example of the America, you always about the chaos between the black and the white that the people of the America give always more and more respect to the people and always give disrespected to the black. The same injustice would you see nowadays in the Pakistan. Another injustice would be that the people in the society would give more priority to the man then then women. This is why the women empowerment is introduced in the world. The women empowerment is changing the Islam which is the religion of the Pakistan regarding to the women. This injustice would not creating the inequalities between the men and the women but this would changing the some part of the Islam. There are more and more injustice that would be creating the inequalities in the society. This would lead us a divergence between the people. These injustice would make the mindset of the society that the powerful man or woman would have receive the respect from the society because they have a money or a frame or they should give more priority to the man then women because the women are weaker than the men. These mindset would not increase the inequality between them but also the society would become imbalanced due to the injustice. Because a powerful man or a women would get everything in the society or in their life like getting respect from other etc but a poor man or a woman who only wanted a source of living like a proper education, a proper shelter, food to eat and money so that he or she would live a better life their actual life are. This inequality would create imbalanced the society. The society where a powerful people lives in the society. In above paragraph, you come to know the real problem that are causing a whole society. A time comes when the only those people will live in the society who have money and a frame. Because the people of the society thinks that the money and the frame could change their life and could get everything. We should finish this mindset and inequality from the society. But the question would raise that how we should overcome or finished this inequality and mindset from the society? There are various ways to overcome or finished this inequality and mindset from the society. These ways are: ? Should give the equal right to the women as they give to the men. ? Give the proper education to the poor man so that they could earn as much as the educated people earn. ? Should show the same respect to the poor people as they showed to the rich people. ? Should not give someone priority over others. ? The powerful people should not show offs and come up to helps the poor who are in great needs of helps. These steps would help the society to change the mindset of the people regarding to the poor people or the poor people. This would change their mind set that the poor people need a real help because they are lacking of everything to live the better life like having a proper education, enough food to eat, having proper shelter and having their rights. Even though, there are many more things they are lacking more in their life. We should help them to give their actual rights that they

totally deserves.
